

## How to run the Hospital Management App { H – M – S }

**Download the zip file { hmsp }**

**First Download latest Xampp here :** <https://www.apachefriends.org>

{ You can also download Wamp or Lamp } and install to run

**Download latest Sublime Text here :** <https://www.sublimetext.com/download>

{ You can also download any suitable code Editor like Visual Studio e.t.c } and install to run

**Extract the Downloaded Zip file and copy the hmsp Folder**

**Paste the whole file inside root directory ( for xampp xampp/htdocs, for wamp wamp/www )**

**Start Xampp and Open PHPMyAdmin in Chrome Browser**  
(<http://localhost/phpmyadmin>)

**Create a database with name: hms**

**Import hms.sql file inside the Folder:../hmsp/SQL File inside the htdocs**

**Run the script :** <http://localhost/hmsp/hospital/index.php>

**For you to remodify the Code**

**Secure Login page Source code :**

<https://codeshack.io/secure-login-system-php-mysql/>

<https://www.javatpoint.com/php-mysql-login-system>

**Download Online Hospital management Template : { Save on time }**

<https://themeforest.net/search/hospital%20management%20system>

<https://www.templatemonster.com/custom/hospital-management-system-website-templates/>

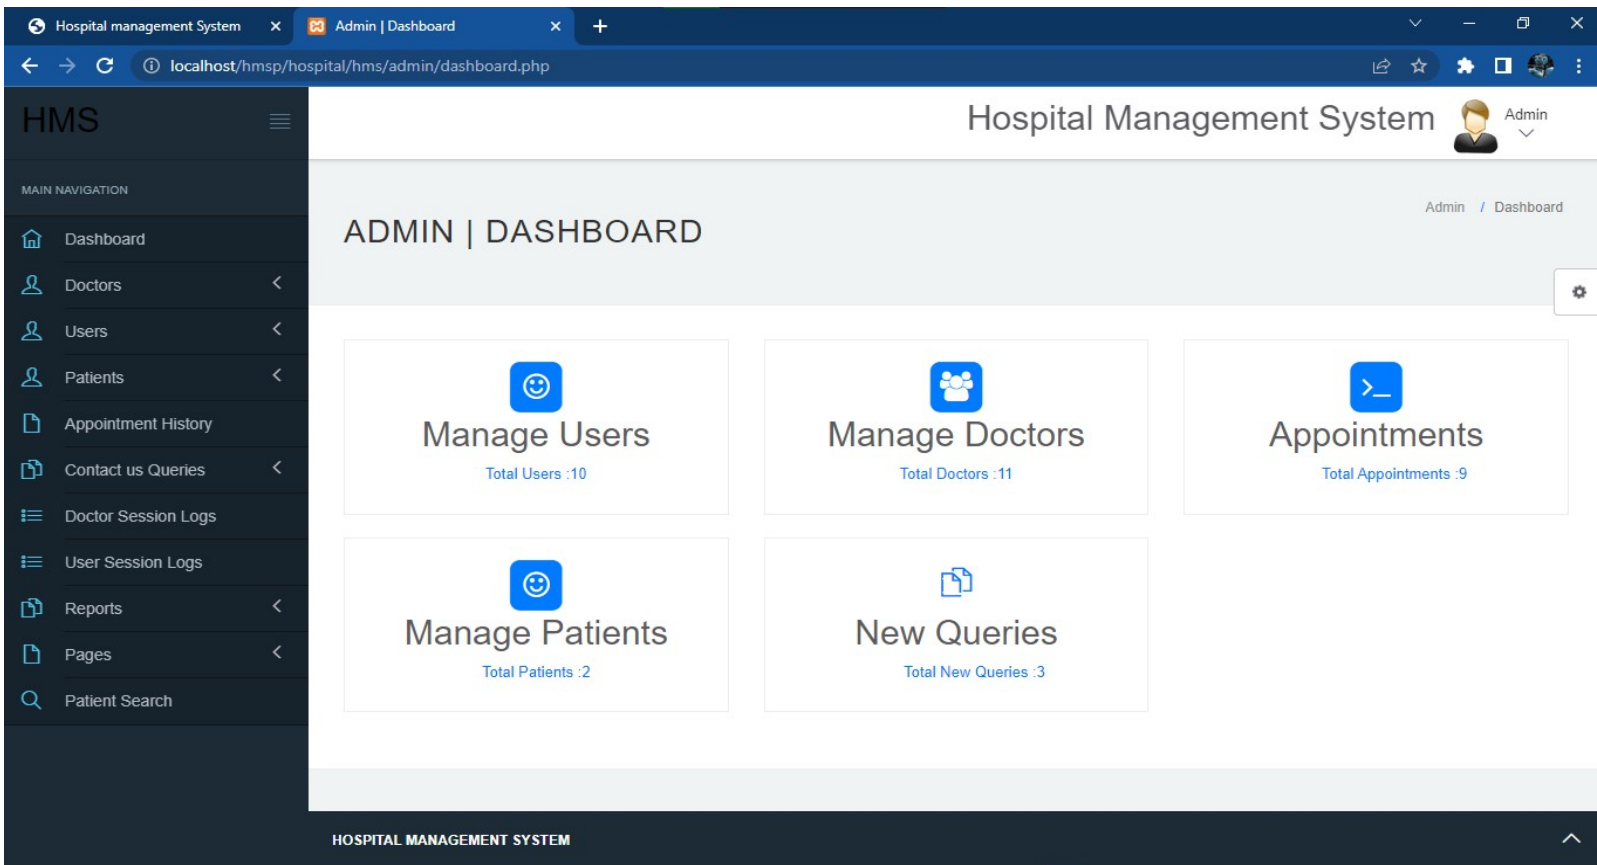

<https://www.getapp.com/healthcare-pharmaceuticals-software/hospital-management/f/customizable-templates/>
